

BioNTech unleashes productivity with empower®

Challenge

Like most biotechnology companies, BioNTech presents results and evaluations by means of numerous PowerPoint presentations. This is done with a high demand on design and aesthetics. And a high input of resources.

Solution

Just a few days after contract signing, the empower® users at BioNTech could easily collaborate and manage slides using the library. On top, the design and layout tools help to quickly migrate to a new master and make slides look like from designer hand.

Result

With empower®, BioNTech received a boost in productivity. It has proven that empower® is a real resource saver. Especially the Mac users in the company are glad about more time and design-optimized slides with empower®.
