

Microsoft always up to date and highly organized with empower®

“We are very satisfied with empower® and its functions, as the tool is very stable. There are many empower® supporters in the larger management group.”

Challenge

As with all global software companies, Microsoft creates a huge amount of training material using PPT. But how to manage thousands of presentations in multiple languages and keep them up to date? A suitable answer had to be found to this question.

Solution

With empower®, Microsoft has found the perfect answer to professional slide management. More than 1,000 empower® users have access to the central library with its automated update functions. And also languages versions can be managed with a few clicks.

Result

With empower®, Microsoft was able to optimize organizing their training material. empower® puts an end to manual updates, time-consuming tracking and complex version management and thus frees up time for the essential things.
