

empower[®] – a charting alternative

A whole new
way to think of
charting

empower® is a popular alternative

Our e-book highlights the possibilities of the charting solution empower® for PowerPoint charts. You will learn about the many capabilities of the empower® PowerPoint add-in for the presentation creation and distribution, including license-free images, icons, and slide templates available directly in PowerPoint, as well as Microsoft 365 optimization. Let yourself be inspired.

Our mission

We know Microsoft 365 like the back of our hand. We have spent day and night with Microsoft 365 for years, getting to know its strengths and weaknesses. That is why we set out in 2005 to revolutionize everyday office life. We develop Microsoft 365 solutions that empower users around the world to work easily, consistently, and efficiently with Microsoft 365. In short: perform at your best and finally have time again for what really drives you. That is our mission.

empower® for PowerPoint charts – Charting for everyone

Just a few years ago, there were few viable solutions for businesses to create complex PowerPoint charts easily and efficiently. With empower® for charts, you now have an alternative that includes essential charting features such as waterfall charts, Gantt charts, Excel links for reports, and much more.

In keeping with our "Be your best at work" philosophy, we want to reach as many people in organizations as possible. That's why we decided to develop an alternative that allows companies to save up to 50% on licensing costs. With our corporate license, you can equip everyone in your company and still save on licensing costs.

A cost-effective alternative - optimized for Microsoft 365

empower® for PowerPoint charts is a popular alternative. Why? empower® offers important charting features, such as waterfall charts, Gantt charts, and Excel links for reports, and convinces with an intuitive and modern design. Familiarization is a breeze and charts can often be created with minimal clicks and mouse movements.

By the way: With empower® you rely on an expert for Microsoft Office add-ins. Over 3 million people already trust empower® to create professional Office documents.

empower® is a partner in the Microsoft Compatibility Lab and Microsoft itself is a customer of empower®.

With the Deloitte Technology Fast 50 Award, we are one of the fastest growing companies in the German technology industry!

Modern PowerPoint charts in just a few clicks

Join us in rethinking PowerPoint charting. Convince with stylish diagrams and at the same time benefit from the full potential of chart creation.

We have optimized the process of creating charts in empower® by minimizing the number of clicks and mouse movements. As a result, you can quickly achieve a perfect result that looks professional and aesthetically pleasing.

Modern diagrams for highest professionalism

With empower® you can easily create modern slides, diagrams, and project plans that demonstrate the highest degree of professionalism and underline the quality of your work. All diagram types are perfectly pre-designed and centrally stored in empower®. So you can create diagrams like a graphic designer with just a few clicks

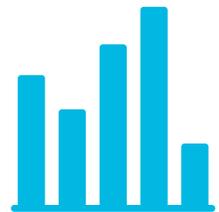

Create charts quickly with empower® for charts

empower® for charts places maximum value on efficiency: the number of clicks and mouse movements for charts has been minimized. For a bar chart with Excel linking, for example, you need on average 1:40 minutes with empower®.

Create the perfect Gantt chart in just a few clicks

A Gantt chart is created fast with empower®, and also offers numerous useful features. For example, you can show school vacations or structure your tasks in phases and collapse them as needed.

Minimize tedious formatting with empower®

We have optimized and rethought the important charting features in empower®, and we have also taken it a step further with new functions that simplify creating presentations from A to Z for you as a PowerPoint professional. The empower® Suite covers the entire process of creating and sharing presentations. On the next two pages you can see what is included in empower® in addition to charting. For particularly time-consuming tasks such as laying out elements, simply take the shortcut with the empower® Layout Tools. For visualization, you can insert stylish icons and high-resolution images directly into your presentations.

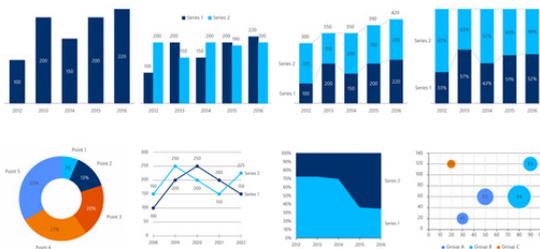

Work fast and beautiful with placeholders

With empower®, charts can be inserted into placeholders. This allows you to easily switch between slide layouts without having to move or resize diagrams. The charts adjust automatically to the selected layout.

Layout PowerPoint slides like the pros

empower® offers more than 50 layout tools in addition to PowerPoint's standard tools for arranging elements. The empower® Layout Tools allow you to quickly position, arrange, scale, and resize elements.

Over 1 million high-quality, royalty-free images, icons, and slide templates

Over 1.5 million free and royalty-free images from the Unsplash.com platform can be searched and inserted into PowerPoint directly via empower® - always in the appropriate resolution. Hundreds of icons and professional slide templates for process illustrations, infographics, and more are also available directly in empower®.

Our exchange service – free of charge and risk-free

It is crucial that the switch to empower® for charts is hassle- and hurdle-free. That is why we developed a risk-free and free-of-charge exchange service. We know which cornerstones are important, so in the end, not only are the numbers right, but all users in the organization are happy with the change.

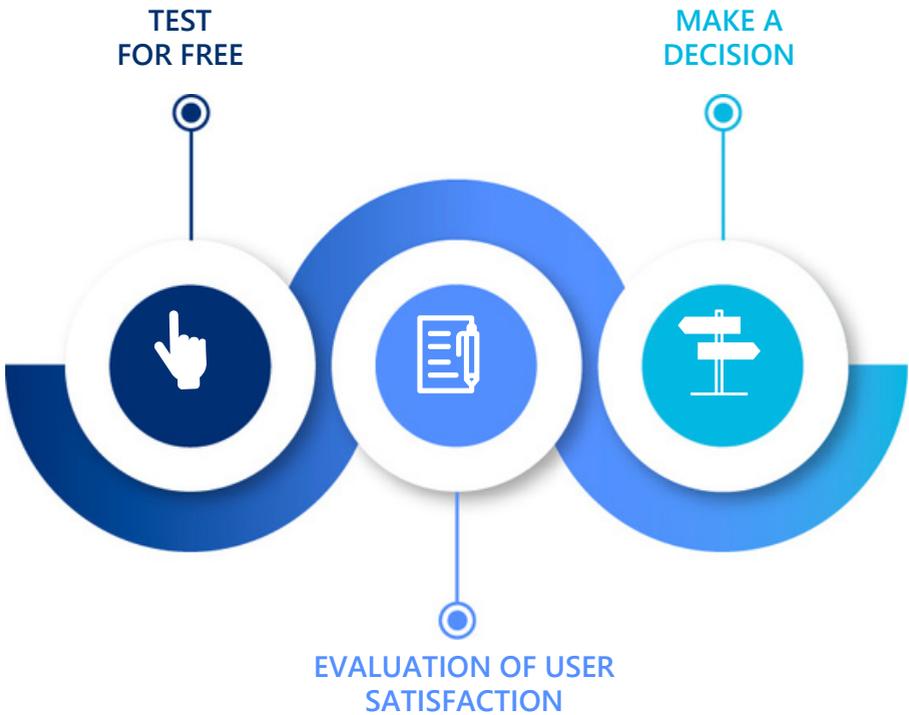

Our exchange service initially consists of a free test phase with subsequent evaluation of user satisfaction. With a converter included in empower®, we also make it easy to convert charts created with another solution into empower® charts. In addition, we will be happy to make you an offer that allows you to use another charting solution and empower® for charts in parallel for a limited period of time at no additional cost, thus ensuring a smooth transition.

Conversion of charts at the push of a button

What actually happens to your existing charts? Quite simply, with our converter, they are converted into empower® charts with a few clicks.

Watch the converter in action here.

Test empower® for charts free of charge

empower® for charts is easy to learn for everyone thanks to its modern user interface and intuitive usability. During the entire test period we are there for you and evaluate the satisfaction of your users afterwards. That way you can ensure acceptance throughout your company and convince all stakeholders to switch!
